

Ethan Hutchison

Lead Developer | AI Orchestration, Full-Stack & Mobile

✉ ethan@ethanh.co ☎ (417) 429-3356 📍 Waco, TX 🌐 <https://ethanh.co/>

Summary

Lead developer on Orqstrate, an AI orchestration platform. Build AI agents, full-stack applications, custom content systems, and mobile products. Published two iOS apps: LymeTrack and FermentBuddy. Bring five years of software engineering experience across enterprise systems and client products, supported by AWS infrastructure and CI/CD expertise.

Experience

Light Works Consulting

Remote

Software Consultant | Lead Developer, Orqstrate

2024 – Present

- **Orqstrate:** Lead developer on an AI orchestration platform. Build across the agent runtime, full-stack application, integrations, and cloud infrastructure.
- Build agent workflows, workspace access controls, provider retries, and marketplace consent with Python, TypeScript, Temporal, and Anthropic.
- Built AWS infrastructure with Terraform, isolated container execution, tenant encryption, and GitHub Actions CI/CD.
- **Talking Bibles International:** Develop an AI-integrated custom CMS with Next.js, React, TypeScript, and Convex for audio content, languages, agreements, and distribution.
- Built and published **LymeTrack and FermentBuddy** for iOS with React Native, Expo, and Convex.
- Deliver client websites with Next.js and Astro, including editable content, forms, analytics, SEO, and accessibility improvements.

FedEx

Remote

Software Developer II | Cloud & DevOps

Jun 2021 – Present

- Led the first Jenkins-to-GitHub Actions migration across about **15 applications**; standardized CI/CD and release promotion.
- Contributed to a **\$500M modernization initiative** and maintained **13 Java and Spring Boot applications**.
- Managed security patches, access controls, production troubleshooting, and test coverage improvements.
- Built GitSync in PowerShell for safe, auditable repository migrations during the FedEx Freight separation.

Projects

Orqstrate | AI Orchestration Platform

2025 – Present

Lead developer through Light Works Consulting for an AI orchestration platform that coordinates agents, cloud execution, project workflows, and tool integrations.

Python · TypeScript · Temporal · Anthropic · AWS · Terraform

Talking Bibles | AI-Integrated Custom CMS

Custom CMS for audio content, languages, agreements, and distribution. Develop AI integration, import validation, related data models, and staff workflows.

Next.js · React · TypeScript · Convex · S3

LymeTrack | Published iOS App

2024 – Present

Published symptom and treatment journal. Built mobile check-ins, data models, trend views, reminders, and release workflows.

React Native · Expo · Convex · Clerk · Sentry

FermentBuddy | Published iOS App

2025 – Present

Published fermentation companion with project tracking, timers, reminders, guided steps, and subscriptions. Built the product through App Store release.

React Native · Expo · Convex · EAS · Superwall

Skills

AI & Full-Stack

AI agents, Anthropic API, TypeScript, React, Next.js, Convex, Python, REST APIs

Mobile & Data

React Native, Expo, EAS, PostgreSQL, Java, Spring Boot, Data modeling

Cloud & Delivery

AWS, Terraform, Docker, GitHub Actions, OIDC, Jenkins, Sentry, PostHog

Education

College of the Ozarks

Point Lookout, MO

B.S. in Computer Information Science

Aug 2018 – May 2022
