Education

College of the Ozarks

B.S. in Computer Information
Science

Point Lookout, MO

August 2018 – May 2022

Experience

Light Works Consulting

Software Consultant | Lead Developer, Orqstrate

Remote

2024 – Present

- **Orqstrate:** Lead developer on an AI orchestration platform. Build across the agent runtime, full-stack application, integrations, and cloud infrastructure.
- Build agent workflows, workspace access controls, provider retries, and marketplace consent with Python, TypeScript, Temporal, and Anthropic.
- Built AWS infrastructure with Terraform, isolated container execution, tenant encryption, and GitHub Actions CI/CD.
- Led junior and mid-level developers and an offshore team. Onboarded engineers and ran two development internships.
- **Talking Bibles International:** Develop an AI-integrated custom CMS with Next.js, React, TypeScript, and Convex for audio content, languages, agreements, and distribution.
- Recovered the client's compromised AWS environment and designed a three-month stabilization program for disaster recovery, secrets, and monitoring.
- Built and published **LymeTrack and FermentBuddy** for iOS. Owned mobile interfaces, data models, reminders, subscriptions, and release workflows.
- Deliver client websites with Next.js and Astro, including editable content, forms, analytics, SEO, and accessibility improvements.

FedEx

Software Developer II | Cloud & DevOps

Remote

June 2021 – Present

- Led the first Jenkins-to-GitHub Actions migration across about **15 applications**; standardized CI/CD and release promotion.
- Contributed to a **\$500M mainframe-retirement initiative**, moving FedEx Freight systems toward modern cloud platforms.
- Maintained **13 Java and Spring Boot applications**, including configuration, security patches, access controls, and production troubleshooting.
- Improved maintainability and raised **test coverage to 80%** across production services.
- Built GitSync in PowerShell for safe, auditable repository migrations during the FedEx Freight separation.
- Retired **90+ redundant config-server instances** through a shared configuration service. Presented engineering roadmaps to **400+ stakeholders**.

Projects

Orqstrate | AI Orchestration Platform

2025 – Present

Lead developer through Light Works Consulting for an AI orchestration platform that coordinates agents, cloud execution, project workflows, and tool integrations.

Build isolated execution, explicit permissions, workflow readiness, and bounded retries. Recent changes include staging verification.

Python · TypeScript · Temporal · Anthropic · AWS · Terraform

Talking Bibles | AI-Integrated Custom CMS

Custom CMS for audio content, languages, agreements, and distribution. Develop AI integration, import validation, related data models, and staff workflows.

Build import dry runs, recording merge analysis, background queues, and controlled downloads from S3.

Next.js · React · TypeScript · Convex · S3

LymeTrack | Published iOS App

2024 – Present

Published symptom and treatment journal. Built mobile check-ins, data models, trend views, reminders, and release workflows.

Owned architecture through App Store release across the client, backend, and data layers. Added crash reporting to support production releases.

React Native · Expo · Convex · Clerk · Sentry

FermentBuddy | Published iOS App

2025 – Present

Published fermentation companion with project tracking, timers, reminders, guided steps, and subscriptions. Built the product through App Store release.

Connect project progress and the next step in a mobile interface, with reminders for work outside the app.

React Native · Expo · Convex · EAS · Superwall

AnkerPak & Luke's Film Lab | Client Websites

AnkerPak: Next.js website for packaging and logistics, with service pages, forms, analytics, SEO, and accessibility fixes.

Luke's Film Lab: Astro photography portfolio with an editable CMS, album collections, image optimization, and a lightbox with film details.

Next.js · Astro · TypeScript · Sveltia CMS · PhotoSwipe

Skills

AI & Full-Stack

AI agents, Anthropic API, TypeScript, React, Next.js, Convex, Python, REST APIs

Mobile & Data

React Native, Expo, EAS, PostgreSQL, Java, Spring Boot, Data modeling

Cloud & Delivery

AWS, Terraform, Docker, GitHub Actions, OIDC, Jenkins, Sentry, PostHog
