

Cloud & data engineer with **5+ years** shipping production systems on **AWS**. I design Well-Architected, multi-tenant infrastructure end-to-end in **Terraform** (ECS Fargate, RDS, VPC, KMS, IAM/ABAC) with keyless **GitHub OIDC CI/CD**, build **ETL/data pipelines**, and deliver production **generative AI on Anthropic**. Enterprise-proven at FedEx (contributed to a **\$500M** cloud-migration initiative) and continually building hands-on AWS depth through independent client engagements — architecture to production, fast. **AWS certifications in progress**.

AWS & CORE TECHNOLOGIES

AWS	EC2 · ECS Fargate · S3 · EFS · RDS Postgres · VPC · ALB · Route53 · IAM / ABAC · KMS · Secrets Manager · CloudWatch / CloudTrail · Lightsail	laC & DevOps	Terraform · GitHub Actions (OIDC) · Docker · CI/CD · multi-env (stage/prod) · Jenkins · cloud migration
Data & Backend	ETL / ELT · PostgreSQL · SQL / NoSQL · schema design · Python · Java / Spring Boot · REST APIs · Convex	Generative AI	Anthropic API · agentic / multi-agent AI · Amazon Bedrock · prompt engineering · RAG
Observability	Dynatrace · Sentry · PostHog · Splunk · AppDynamics	Frontend	TypeScript · React · React Native / Expo · Tailwind · Agile / SCRUM

EXPERIENCE

FedEx — Software Developer II · Cloud & DevOps

Remote · Jun 2021 — Present · 5 yrs

Promoted Intern (2021) → Developer I (2022) → Developer II (2023) · maintains 13 enterprise applications

- Led the organization's **first migration from Jenkins → GitHub Actions** across **~15 applications** — standardized automated **CI/CD** (build → test → deploy) and a build-once-promote release flow adopted as the template for future conversions.
- Contributed to a **\$500M mainframe-retirement initiative**, migrating mission-critical FedEx Freight systems from legacy/private infrastructure to modern **cloud infrastructure**.
- Administered **13 enterprise Java/Spring Boot apps** (configuration, security patching, IAM, production troubleshooting); raised **test coverage to 80%** and cut refactoring time **~50%** with AI-assisted analysis.
- Built **GitSync** (PowerShell) for safe, auditable batch Git-repo migration during FedEx Freight's multi-billion-dollar corporate separation.
- Drove DevOps modernization — retired **90+** redundant config-server instances via a shared config service — and presented roadmaps to **400+ stakeholders**.

Light Works Studio — Independent Cloud & Data Consultant

Remote · 2024 — Present

Independent client engagements & self-built products — deepening hands-on AWS, data-engineering, and GenAI delivery.

- AWS platform & Orqstrate (product)**: Designed & deployed a **multi-tenant AWS platform end-to-end in Terraform** — ECS Fargate, RDS Postgres, S3/EFS, VPC, ALB — with **KMS per-tenant envelope encryption**, IAM/ABAC, and **GitHub OIDC** keyless CI/CD across two isolated environments; built **Orqstrate**, an **Anthropic**-powered agentic platform orchestrating fleets of AI agents in isolated Fargate/Docker workers.
- DMP — client engagement (2026)**: Built a Python **email → ERP ETL pipeline** — **OCR extraction (~95% accuracy)** of purchase orders into **Epicor**, ~220 orders/day; designed the data flow, **schema migrations**, and validation / human-in-the-loop layer.
- Talking Bibles Intl. — client engagement (2025–Present)**: Recovered a fully compromised **AWS environment (EC2, S3, Lightsail, Route53, IAM)** and designed a **3-month stabilization program** (DR, centralized secrets, 24/7 monitoring).
- Shipped production apps **built on Anthropic** (LymeTrack, FermentBuddy) from architecture through release, with Sentry/PostHog observability.

SELECTED PROJECTS

- Orqstrate

AWS · ANTHROPIC

Agentic AI platform on AWS — Terraform · ECS Fargate · RDS · KMS multi-tenant · Anthropic.
- LymeTrack

ANTHROPIC

Health-tracking app — React Native · Expo · Convex real-time · Clerk · 200+ tests.
- FermentBuddy

ANTHROPIC

React Native 0.81 / Expo SDK 54 · Convex serverless · EAS · Superwall.
- Genni

B2B lead-gen SaaS — Python FastAPI multi-agent · Convex · Stripe · sub-100ms pipeline tracking.

EDUCATION & CERTIFICATIONS

- B.S., Computer Information Science

College of the Ozarks · Point Lookout, MO · 2022
- AWS CERTIFICATIONS — IN PROGRESS

Cloud Practitioner (exam scheduled) · Solutions Architect – Associate — 2026
